ROOFING AND WALL SHEETS

Coated Steel Sheet has been used subsidiary to the construction industry throughout the world for nearly two centuries, because of the excellent corrosion resistance. It has become the preferred material for a wide range of construction particularly for roofing and cladding.

SPECIFICATION

Glavanized Color Coated Steel (PPGI)
Aluminium Zinc Alloy coated sheet (PPGL)
Coating Mass 120 GSM, Yield Strength 240 mpA
Coating Mass AZ 150, Yield Strength 340-550 mpA

Z & C PURLIN

It is used to support the wall and Roof panels.

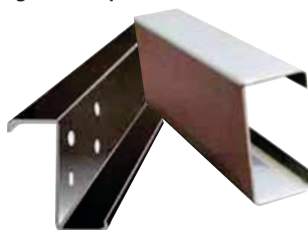

SPECIFICATION

Hot Rolled (HR)

Z & C purlin yield strength 240 mpA

Glavanized (GI)

Z & C purlin coating mass 120 GSM yield strength 240 mpA

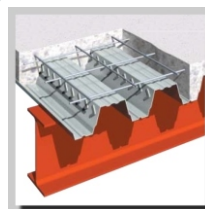

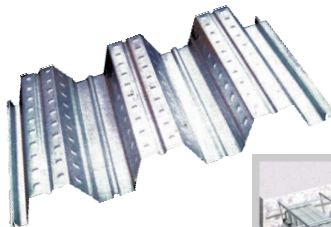

STEEL DECKING SHEET

The composite floor profile offers the ultimate in the light weight steel decking sheet which reduced concrete usage to provide a cost effective and alternative floor solution for easy installation.

SPECIFICATION

Glavanized (GI) steel decking sheet

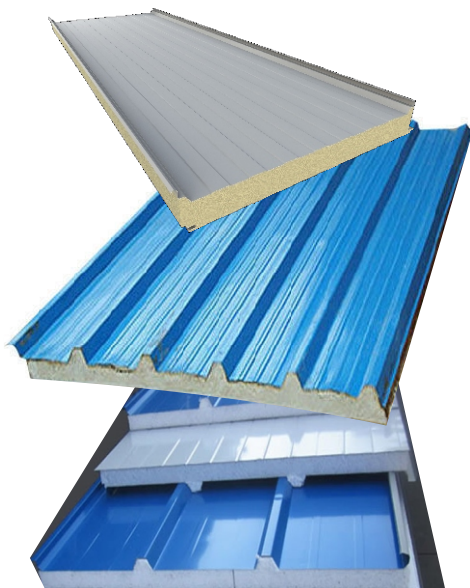

Trapezoidal Metal Deck sheets. Coating mass 120, yield strength 240 mpA, effective width 931mm, depth 50 mm

Astal Interbuild Private Limited

SANDWICH PANELS

PU/PIR sandwich PUF panels
Rock wool core sandwich panels
EPS core sandwich panels

Astal Polycarbonate Sheets and strip lighting
Rigid Polycarbonate transparent roof Glazing
sheets available in required length for matching
color coated sheets, profiles made out of Astal

SPECIFICATION

Astal Brand Polycarbonate sheets, Embossed to
suit any Metal Profile

TURBO VENTILATOR

Exhaust industrial pollutants such as smoke,
dust, Poisonous gases, humidity fumes, heat and
many more invisible intants. Turbo Ventilator
provide energy free cooling and fresh air
throughout the year.

SPECIFICATION

24"Aluminium

TRUSSLESS ROOFING

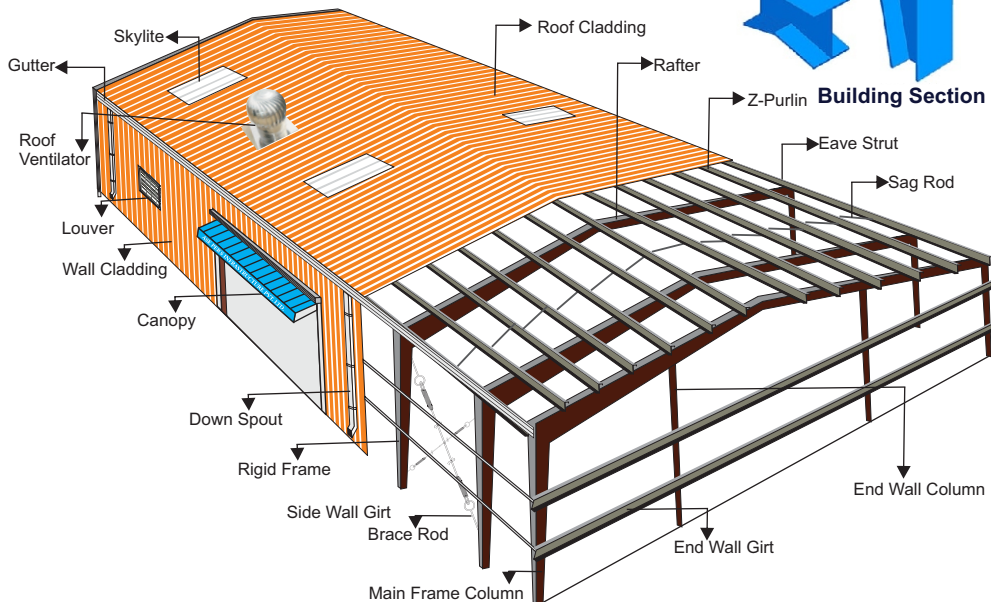

Astal offer customized and general Trussless
Roof, designed to suit commercial and industrial
roofing needs.

Trussless Roofing System is made up
of unique self-supporting roofing technology.
Truss less roof for mills are fabricated with
quality material and available in different
ranges and thickness. Manufactured with
modern technology to filter UV rays, helps
to protect the machines from deterioration.
